

Research Study: Data Science for Engineers

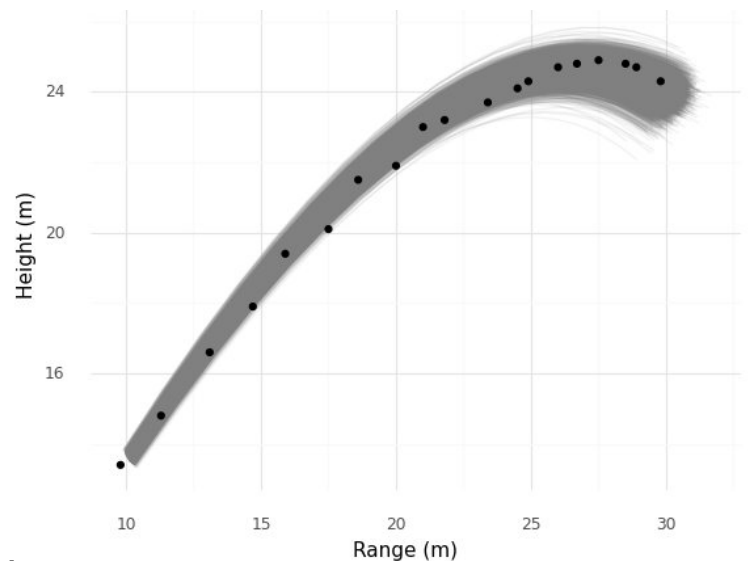

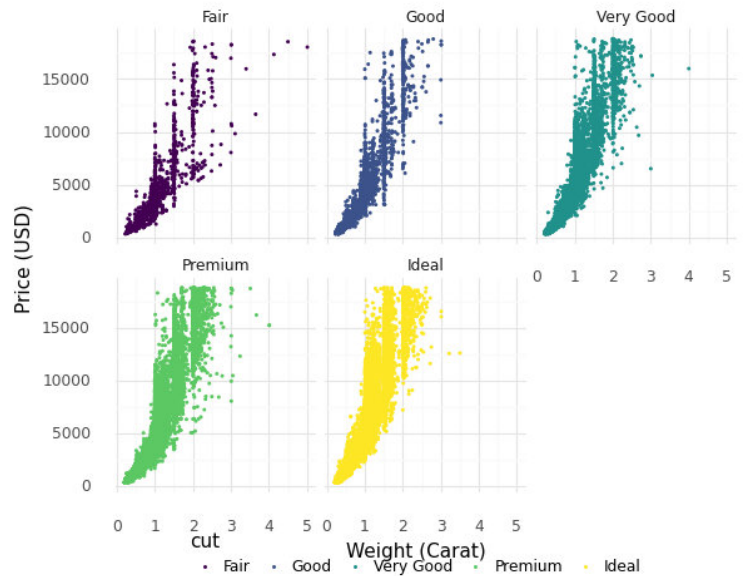

Olin College
of Engineering

Are you a practicing engineer with experience in structural analysis/design?
Interested in learning how data science can be useful in your career?

Prof. del Rosario at Olin College is conducting a research study that includes a **free**, 6 week professional development opportunity for practicing engineers in the Summer of 2022, starting in June.

Learn how to:

- **Wrangle** data with code to automate tedious tasks
- **Visualize** data for striking and informative graphs
- **Understand** data with statistical reasoning
- **Analyze** engineering models with quantified uncertainties

Receive a certificate of completion from Olin College for the 6 week course
