ABOUT THE PROGRAM:

The DUIRI program provides opportunities for undergraduate students to work with researchers on cutting-edge research in global security, health and sustainability. In these projects, a combination of faculty and students having two or more distinct disciplinary strengths research solutions.

During the summer, student teams will be responsible for pursuing their research projects, which culminate in a poster presentation and one-page abstract/summary of results. Assuming all requirements are met, each participating student will earn a \$5,000 summer term scholarship from the DUIRI program.
