

PAVEMENT CRACK ANNOTATORS WANTED

Your annotations become the foundation for every computer vision model we develop.

THE PAVEMENT SURFACE

A FINE CRACK MAY BE ONLY A FEW PIXELS WIDE

Precision and consistency matter more than speed

WHAT YOU'LL DO

Use CVAT to paint pixel level masks over open and sealed cracks. Complete assigned image batches, then revise specific frames after quality review.

WHO FITS

Patient, consistent students who can follow a written convention and ask when a case is ambiguous. No coding or pavement background required.

HOW WE SELECT

Selected applicants complete a structured interview and a short annotation exercise using real project images. Training is provided.

APPOINTMENT TERMS

Compensation: \$15/hour
Time Commitment: Approximately 5 hours/week
Duration: Approximately 16 weeks
